# ■ OBJECTIVES

- Describe the process of coding, testing, and converting an organizational information system and outline the deliverables and outcomes of the process.
- Apply four installation strategies: direct, parallel, single-location, and phased installation.
- List the deliverables for documenting the system and for training and supporting users.
- Explain why system implementation sometimes fails.
- Describe the threats to system security and remedies that can be applied.

# MAJOR TOPICS

## SYSTEM IMPLEMENTATION

- System implementation process

## SYSTEM CONSTRUCTION (CODING) & TESTING

- System construction
- Types of system testing

## INSTALLATION

- Types of system installation
- Planning the installation

## DOCUMENTING THE SYSTEM

- Generic guidelines

## TRAINING AND SUPPORT

- Types of training
- Support

## ORGANIZATIONAL ISSUES

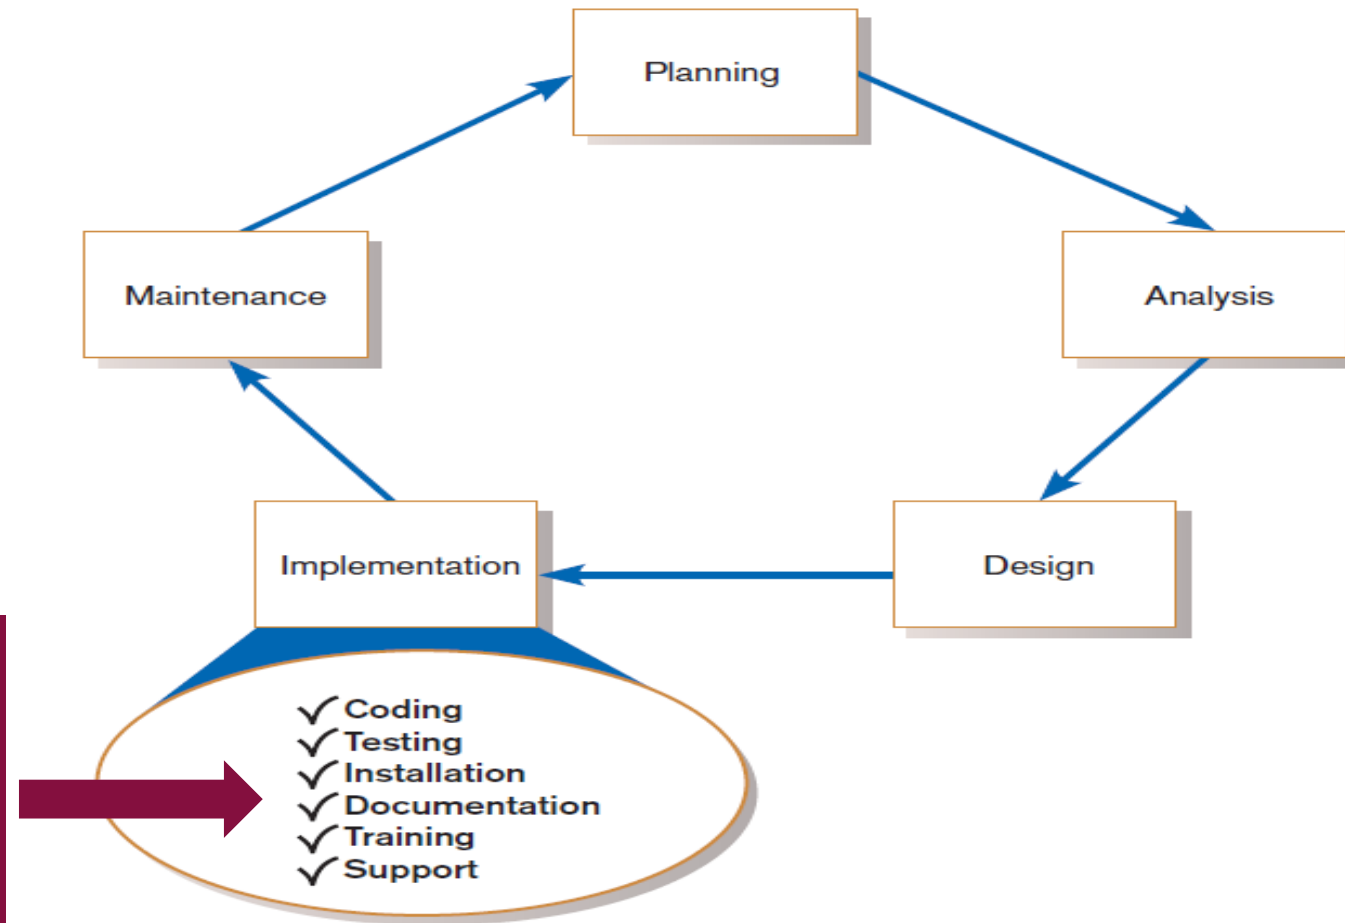

- Factors
- Security issues
- Project closure

# ■ MAJOR TOPICS

## SYSTEM IMPLEMENTATION

- System implementation process

# ■ RECAP: SDLC

Systems development life cycle with the implementation phase highlighted

# ■ SYSTEM IMPLEMENTATION

- Purpose:
  - To convert final physical system specifications into working and reliable software
  - To document work that has been done
  - To provide help for current and future users

# SYSTEM IMPLEMENTATION – MAJOR ACTIVITIES

## CODING

Physical design specifications are turned into working computer code.

## TESTING

- Tests are performed using various strategies.
- Testing is performed in parallel with coding.

## INSTALLATION

The current system is replaced by a new system.

## DOCUMENTATION

Two audiences for final documentation:

- **Information systems personnel** who will maintain the system throughout its productive life
- People who will use the system as part of their daily lives (**system user**)

## TRAINING

- Application-specific
- General for operating system and off-the-shelf software

## SUPPORT

- Automating support (chatbot)
- Help desk

# ■ SYSTEM IMPLEMENTATION DELIVERABLES

**TABLE 13-1** Deliverables for Coding, Testing, and Installation

1. Coding	3. Installation
a. Code	a. User guides
b. Program documentation	b. User training plan
2. Testing	c. Installation and conversion plan
a. Test scenarios (test plan) and test data	i. Software and hardware installation schedule
b. Results of program and system testing	ii. Data conversion plan
	iii. Site and facility remodeling plan

**TABLE 13-2** Deliverables for Documenting the System, Training, and Supporting Users

1. Documentation	3. User Training Modules
a. System documentation	a. Training materials
b. User documentation	b. Computer-based training aids
2. User Training Plan	4. User Support Plan
a. Classes	a. Help desk
b. Tutorials	b. Online help
	c. Bulletin boards and other support mechanisms
